- A detailed plan view of the Chuāndòng cave system. The map shows a complex network of chambers and passages. Key chambers are labeled: E15, P7, P2, P84 (a large central chamber), E20, E10, P10, E3, and another E20 at the far right. The map is color-coded to show different geological features: light green for calcite flows, brown for argillaceous areas, and tan for talus. Various symbols indicate entrances, air currents, and specific cave features like stalagmites and stalactites. Elevation points are marked with red numbers: 1328, 1320, 1315, 1303, and 1237. A north arrow is located below the plan view.
- A projected section (Coupe projetée Az 8°) of the Chuāndòng cave system. This view shows the vertical profile of the cave, highlighting the chambers and passages from a different perspective than the plan view. The chambers E15, P7, P2, P84, E20, E10, P10, E3, and E20 are visible. The map shows the vertical structure of the cave, including the height of the chambers and the depth of the passages. Elevation points are marked with red numbers: 1328, 1320, 1303, 1285, 1245, 1182, and 1246. A scale bar is located below the section view.
